

Name: Rashi Bhandari

Course: MCA

Section: A

Semester: 2

University Roll no: 2001120

Subject Name: CN Lab

Subject code: PHC 202

Problem statement 1: There is an organization A with multiple departments. Design a network for the HR department and the size of the department is 10 users. Also, show the connection between user no 1 and user no 5 of the network.

Objective: To understand how to create a wired LAN using switch in packet tracer.

Description: Steps for practical and paste snapshot of network design, IP configuration and connectivity.

Step 1: In Bottom left select End Devices and click on pc icon. Select 10 pcs.

Step 2: Then, bottom left select Switches

Step 3: click the "connections" icon and select a cable then connect it to the pcs to switch.

Step 4: Double click on a pc, a box will appear, click on the "Desktop Tab" and then select "IP configuration". write IP address of network.

Rashi

Subnet Mask will appear automatically.

Step 5: Give IP address to each PC.

Step 6: Double click on PC, a box will appear
click on the "Desktop tab" choose command
prompt and connect with 5th pc using
Ping 192.168.1.5.
